MESSAGE	Error Message
FIELD1	Your variable data which we send you back in response
FIELD2	Your variable data which we send you back in response

Response will be in json format. E.g.

Request:

http://dmr.rechargeblast.com/money_api/getbalance?member_id=1234567890&api_password=12345&api_pin=87568&field1=&field2=

Response:

```
{"ERROR":0,"STATUS":"SUCCESS","BALANCE":"10","MESSAGE":"Your wallet balance is 10","FIELD1":"","FIELD2":""}
```

2.WALLET EXIST CHECK REQUEST URL

A. JSON Format PostRequest

URL: http://dmr.rechargeblast.com/money_api/checkuser

Get variable included in URL

Get Parameters	
member_id*	Your Member no
api_password*	Your api password
api_pin*	Your api PIN
mobile_no*	Customer mobile no

Response:

ERROR	Error code(0->success, other failed)
MOBILENO	Customer mobile no
ACCOUNTEXISTS	0=> wallet did not exist,1-> wallet exist
MESSAGE	Error Message

Response will be in json formatE.g.

SUCCESS

```
{"ERROR":"0","STATUS":"SUCCESS","ACCOUNTEXISTS":"1","MOBILENO":"9999999999","MESSAGE":"Customer mobile is registered with our banking partner system.", "ip":"202.142.119.46","request":{"member_id":"9999999999","api_password":"9999999999","api_pin":"12345","mobile_no":"9999999999"}}
```

ERROR

```
{"ERROR":"0","STATUS":"FAILED","ACCOUNTEXISTS":"0","MESSAGE":"Oops ! this customer's mobile is not registered with our banking partner system, register now", "ip":"202.142.119.46","request":{"member_id":"9999999999","api_password":"9999999999","api_pin":"12345","mobile_no":"9999999999"}}
```

3.WALLET CREATION REQUEST URL

A.JSON Format Post Request

URL: http://dmr.rechargeblast.com/money_api/createuser

Get variable included in URL

Get Parameters	
member_id*	Your Member no
api_password*	Your api password
api_pin*	Your api PIN
mobile_no*	Customer mobile no
customer_name*	Send your customer name for the wallet

Response:

ERROR	Error code(0->success, other failed)
MOBILENO	Customer mobile no
ACCOUNTEXISTS	0=> wallet did not exist,1-> wallet exist
REQUESTNO	for OTP verification use this REQUESTNO
MESSAGE	Error Message

Response will be in json format.E.g.

Response:

```
{"ERROR":"0","STATUS":"SUCCESS","ACCOUNTEXISTS":"0","MOBILENO":"999999999","REQUESTNO":"59817846ef332","MESSAGE":"Customer successfully register with us.", "ip":"202.142.119.46","request":{"member_id":"9999999999","api_password":"9999999999","api_pin":"12345","mobile_no":"9999999999","customer_name":"ABC"}}
```

Note: verify Otp by “verifyOtp” API using “REQUESTNO” received in Response.

4. VERIFY OTP REQUEST URL

A. JSON Format Post Request

URL: http://dmr.rechargeblast.com/money_api/verifyotp

Get variable included in URL

Get Parameters	
member_id*	Your Member no
api_password*	Your api password
api_pin*	Your api PIN
mobile_no*	Customer mobile no
request_no*	Request no provided by us
otp*	unique code send to customer 's mobile

Response:

ERROR	Error code(0->success, other failed)
MOBILENO	Customer mobile no
OTPVERIFY	0=>otp verification failed,1=>otp verification success
MESSAGE	Error Message

Response will be in json format.E.g.

Response:

```
{"ERROR":0,"MOBILENO":"1234567890","OTPVERIFY":1,"MESSAGE":"Success"}
```

5. USER DETAILS REQUEST API

A. JSON Format PostRequest

URL: http://dmr.rechargeblast.com/money_api/getbeneficiary

Get variable included in URL

Get Parameters	
member_id*	Your Member no
api_password*	Your api password
api_pin*	Your api PIN
mobile_no*	Customer mobile no

Response:

ERROR	Error code(0->success, other failed)
MOBILENO	Customer mobile no
ACCOUNTEXISTS	0=> wallet did not exist,1-> wallet exist
BALANCE	Customer Wallet balance
limit	
BENEFICIARYLIST	List of beneficiary(json array)
